DETAILED ACTION

1. This Office Action acknowledges the applicant's amendment filed 9 April 2009. Claims 1, 4, and 20 are pending in the application; and claims 2, 3, and 5-19 are cancelled.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9 April 2009 has been entered.

Claim Objections

3. Claim 4 is objected to because of the following informalities: Proper usage of trademarks requires that they be capitalized at all times. See MPEP § 608.01(v). Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3728

5. Claims 1, 4, and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. Claim 1 recites the limitation "said other chamber" in lines 5 and 6. There is insufficient antecedent basis for this limitation in the claim.

7. Claim 20 recites the limitation "said other chamber" in lines 2 and 3. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Hermelin et al. (US Patent 6,375,956).

With respect to claim 1, figure 8A of Hermelin teaches a suppository package comprising a package 110 having a chamber 124 formed therein, the chamber containing a suppository (see column 15, lines 59-67; and column 16, lines 1-7) therein, the package having another chamber formed therein, the another chamber 126 being separate from the chamber and containing a cream, which is a lubricant (see column 15, lines 59-67; and column 16, lines 1-7) therein.

Art Unit: 3728

With respect to claim 20, figure 8B of Hermelin teaches the chambers are constructed for being opened simultaneously.

Claim Rejections - 35 USC § 103

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

11. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

12. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hermelin et al. (US Patent 6,375,956) as applied to claim 1 above, and further in view of Davidowitz (US Patent 3,712,300).

With respect to claim 4, Hermelin does not teach the lubricant is a greasy ointment or VASELINE. However, Davidowitz teaches that VASELINE is used as a lubricant (see column 5, lines 67 and 68). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to

Art Unit: 3728

use VASELINE as a lubricant, as taught by Davidowitz (see column 5, lines 67 and 68), to reduce friction when the suppository is used.

Response to Arguments

13. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
